Pivot Track Closer

***Move soil in from a wider area up to 15' 2" wide
Hydraulic adjustable pitch allows you to control the
amount of soil moved from the seat of the tractor.
Four different models to pick from.***

Besler Features

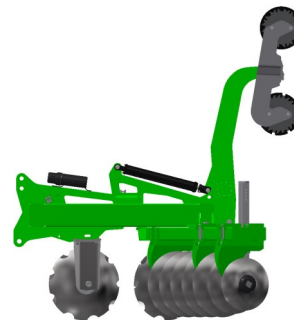

- Hydraulic adjustable pitch
- Floating Double Basket Assembly
- Heavy Duty 5x7 rec tube frame
- Notched discs to breakdown the pivot track side wall
- Implement Stands

The Besler Pivot Track Closer is designed to close the pivot track and leave the ground packed and level with one pass over the pivot track. The hydraulic adjustable pitch allows you to move the desired amount of soil needed to fill the track. The hydraulic double basket assembly will break up the clods and leave the field level or slightly humped if desired. This is all done from the comfort of your cab. Tractor weights can be added to the double basket to run in free float or hydraulic down pressure can be used.

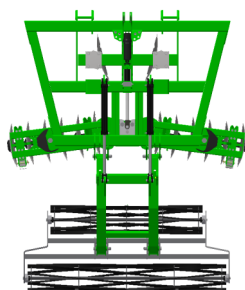

Besler Options

- Guide Wheel
- Weight Brackets for Double Basket Assembly
- Weight brackets for main section of the machine
- Tractor Weights
- Disc Scrapers

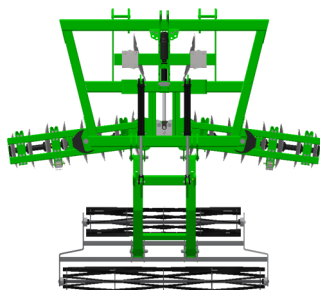

The double basket assembly folds up for storage purposes and easy transport.
